Magento 2 Out of Stock Notification Extension

Created: 11/04/2017 Latest update: 22/08/2019 By: Agile Codex Ltd. E-mail: <u>support@agilecodex.com</u> Copyright © Agilecodex Ltd. 2019

Installation

Never do anything directly on a live store. First setup and test on a development domain (i.e. "dev.url.com").

Make sure that you set your Magento application to the developer mode.

Temporarily disable Magento cache

To avoid any possible issues with the installation we recommend disabling Magento cache before proceeding with the installation and re-enabling it once the install is complete.

- 1. Log in to your Magento admin
- 2. Go to System > Cache Management
- 3. Select "Select All" in the "Mass Actions" drop down
- 4. Select "Disable" in the "Actions" drop down and Click Submit
- 5. Once the page reloads **log out of the admin**

Upload Acx Out of Stock Notification Extension

Using your favorite <u>FTP client</u>, upload all files and folders to the **root folder** of your Magento installation.

Install Extension

- 1. Enable Acx_Backend module
- 2. Enable Acx_OutOfStockNotification module.

For how to enable magento 2 module follow this link.

Configurations

- Go to Stores -> Settings -> Configurations -> AGILE CODEX -> Out Of Stock Notification
- 2. General Settings

In 'General Settings' Admin can define the notification method as Automatic or Manual. In Automatic option, the notification emails will be sent automatically to the user when the product gets back in stock. In Manual, the admin has to manually notify the users. In Admin Email id field, the Admin has to set an email id from which all the notification emails will be sent to the users. In Admin Name, the admin has to enter his name.
